

Lab Assignment - flowchart and Java programming.

Q①. Check Positive Number.

Code Solution :-

```
public class logic {
```

```
    public static void main (String args[]) {
```

```
        int num = 9 ;
```

```
        if (num > 0) {
```

```
            System.out.println ("Number is positive");
```

```
        } else {
```

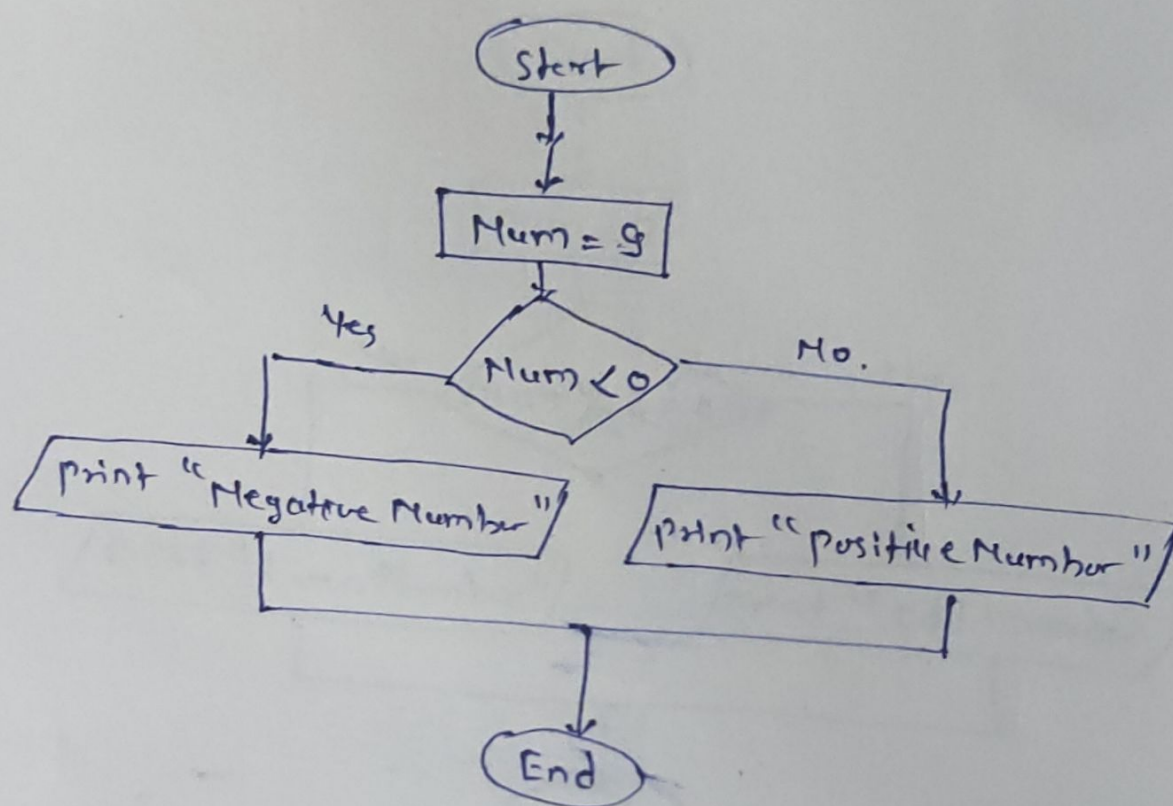

```
            System.out.println ("Number is negative");
```

```
        }
```

```
    }
```

```
}
```

Q2. Check Negative Number.

Code Solution :-

```
public class logic {
```

```
    public static void main (String args []) {
```

```
        int num = -9;
```

```
        if (num < 0) {
```

```
            System.out.println("Number is negative");
```

```
        } else {
```

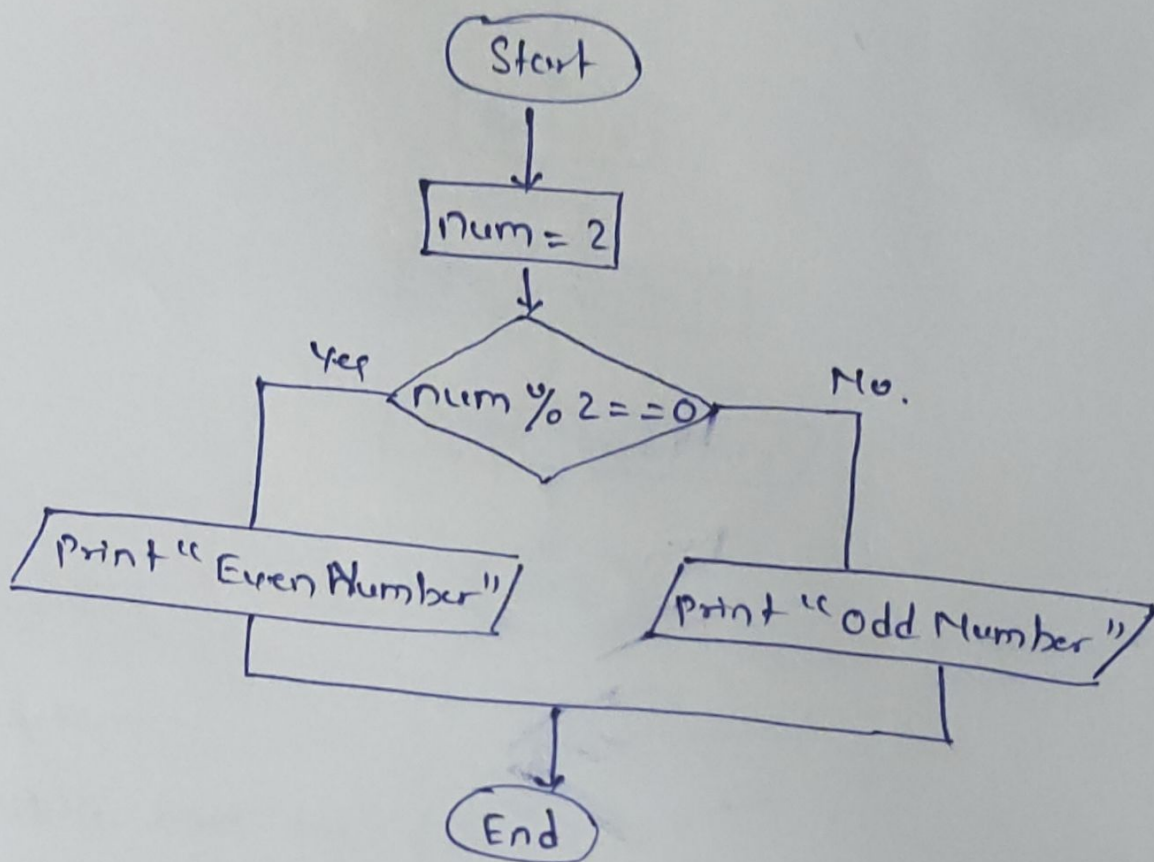

```
            System.out.println("Number is positive");
```

```
        }
```

```
    }
```

```
}
```

Q(3). Check Even or Odd Number.

Code Solution :-

```
public class Logic {
```

```
    public static void main(String args[]) {
```

```
        int num = 6 ;
```

```
        if (num % 2 == 0) {
```

```
            System.out.println("Even Number");
```

```
        } else {
```

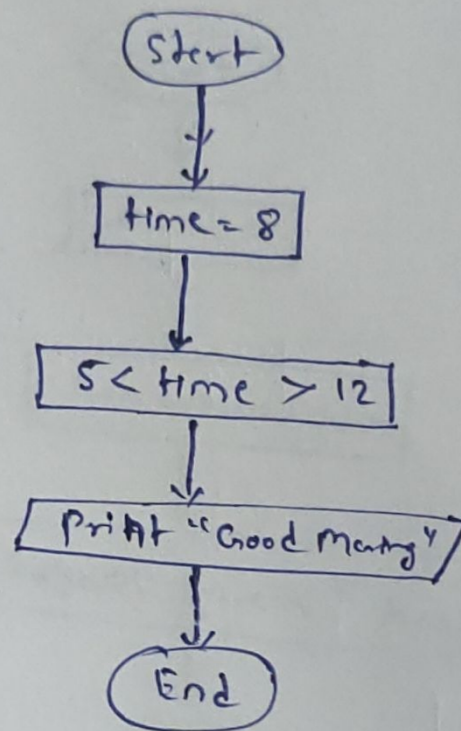

```
            System.out.println("Odd Number");
```

```
        }
```

```
    }
```

```
}
```

Q. Display Good Morning message based on time.

Code Solution :-

```
public class logic {
```

```
    public static void main (String args []) {
```

```
        int time = 8;
```

```
        if (time > 5 && time < 12) {
```

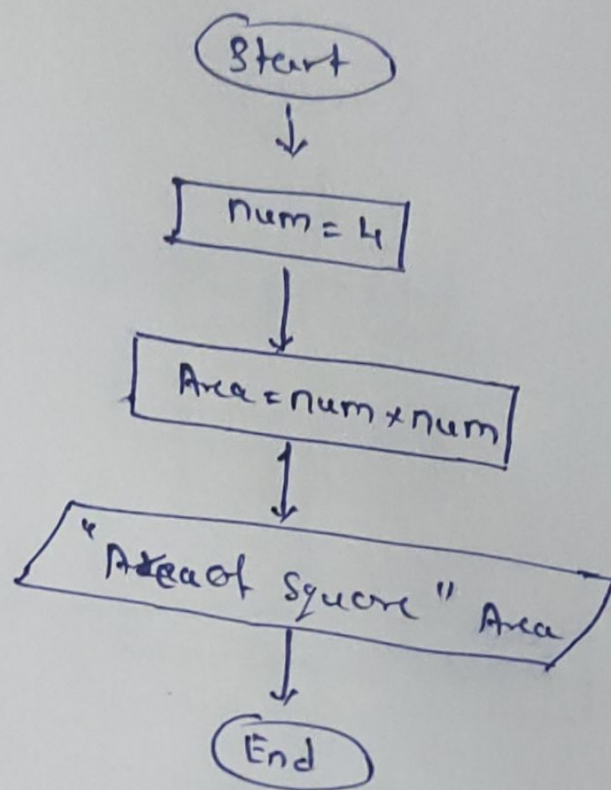

```
            System.out.println ("Good morning");
```

```
        }
```

```
    }
```

```
}
```

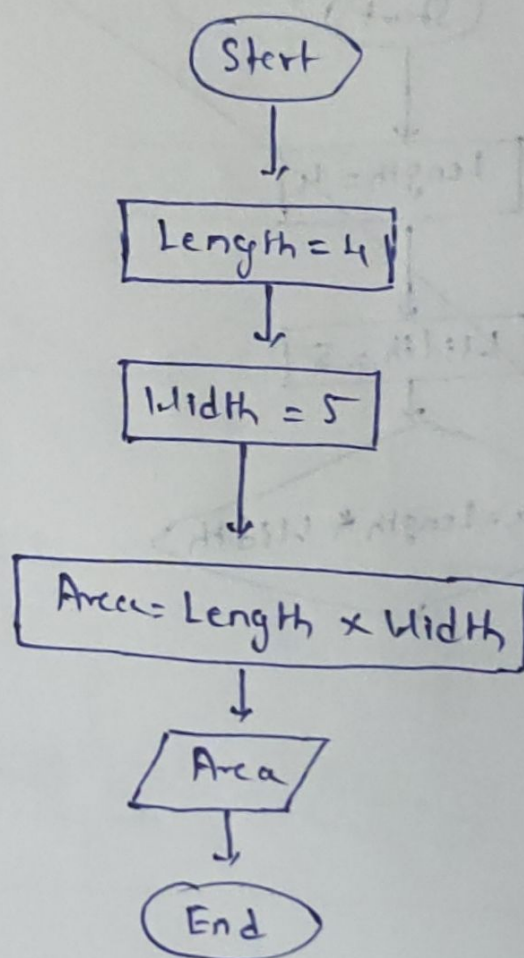

Q 5. Print Area of Square.

Code Solution :-

```
public static class logic {  
    public static void main (String args[]) {  
        int Side = 4;  
        int Area = Side * Side;  
        System.out.println ("Area of Square" + Area);  
    }  
}
```

Q6. Print Area of a Rectangle.

Code Solution:-

```
public class logic {
```

```
    public static void main (String args []) {
```

```
        int length = 4;
```

```
        int width = 5;
```

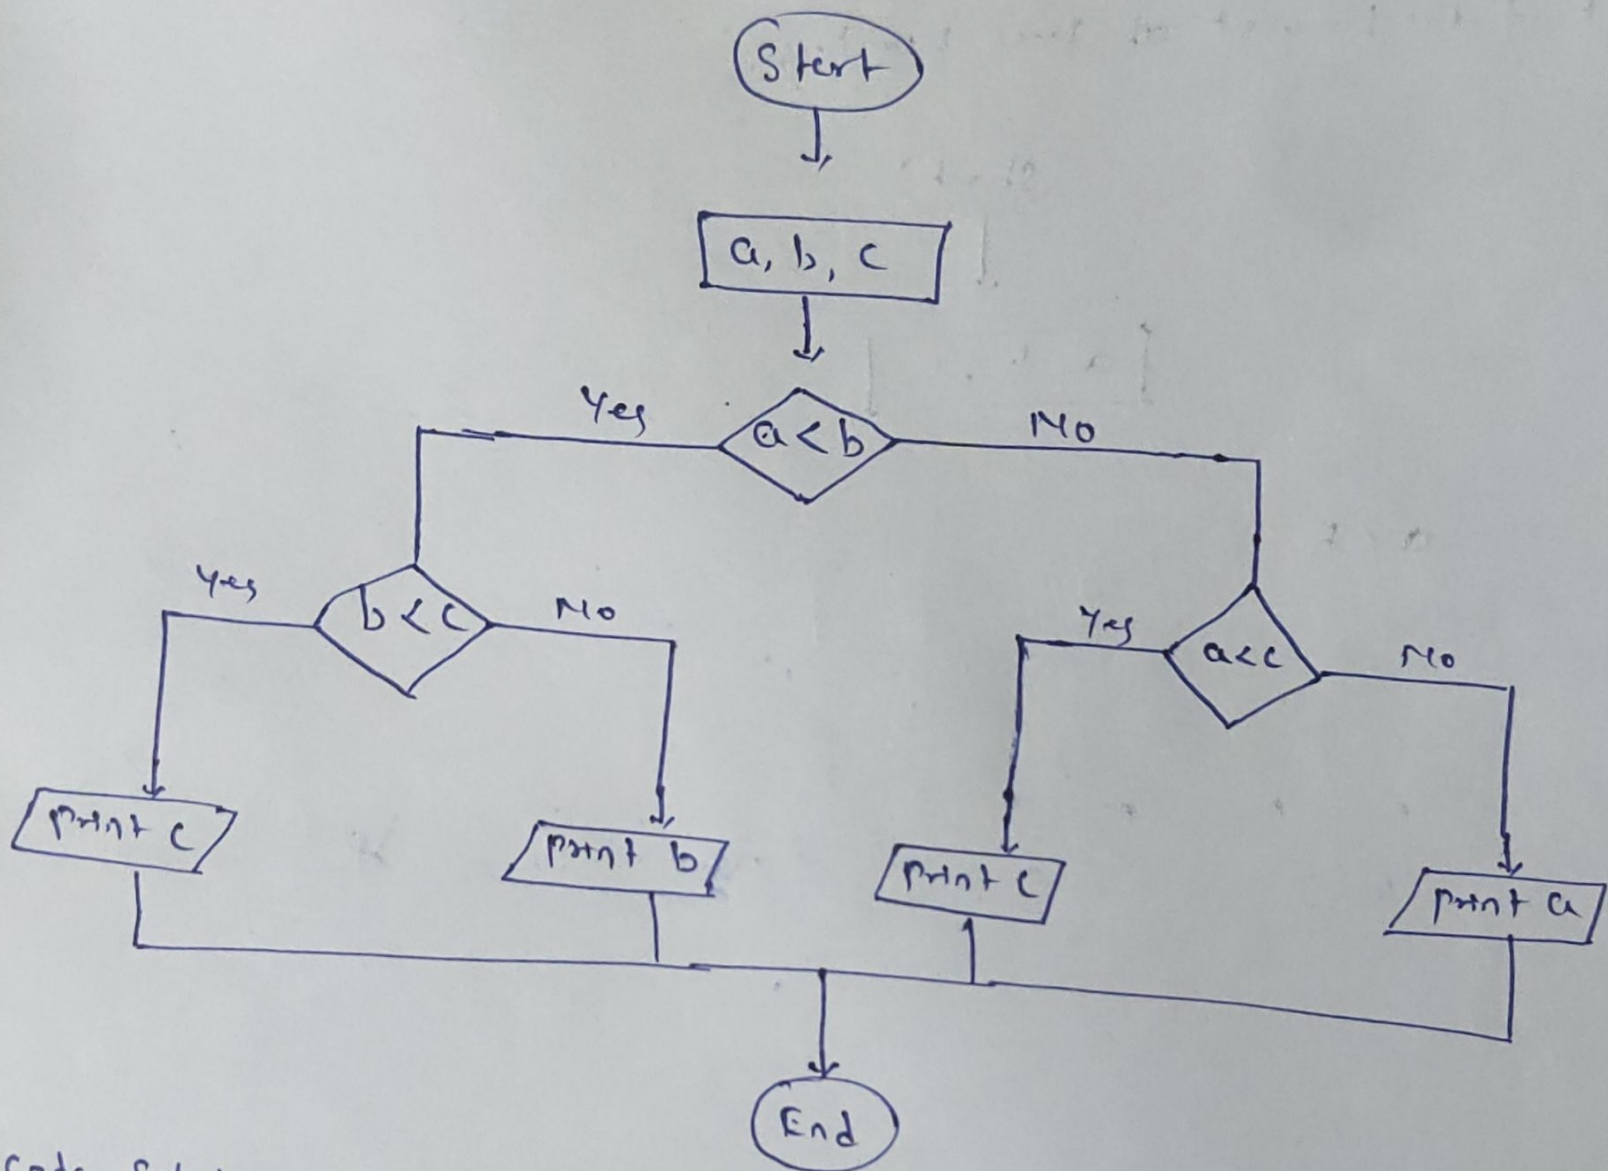

```
        int Area = length * width;
```

```
        System.out.println("Area of Rectangle" + Area);
```

```
    }
```

```
}
```

Q(7). Find the largest of three numbers.

Code Solution.

```
public class logic {
```

```
    public static void main (String [] args) {
```

```
        int a = 10;
```

```
        int b = 5;
```

```
        int c = 11;
```

```
        if (a > b && a > c) {
```

```
            System.out.println (a);
```

```
        } else if ( b > a && b > c) {
```

```
            System.out.println (b);
```

```
        } else {
```

```
            System.out.println (c);
```

```
        }
```

```
    }
```

```
}
```
